

VOL. 66. NO. 26.

JANESVILLE, WISCONSIN, TUESDAY, APRIL 10, 1917.

NIGHT DRIVE
WINS RIDGE
FOR BRITISHGERMANS ARE DRIVEN FROM
VIMY RIDGE, MOST IMPORT-
ANT STRATEGIC POSITION ON WEST
FRONT.

TAKE 9,000 PRISONERS

Official Announcement Reports Large
Number of Captives Taken Into
Custody.—Continue Fight
on Fifty Mile Line.

(BY ASSOCIATED PRESS)

London, April 10.—It is officially re-
ported the British captured 9,000 pris-
oners and 100 guns in yester-
day's fighting. Heavy fighting took
place last night on the northern end of
Vimy Ridge, from which the Germans
were driven. The eastern slope
was also cleared.Near St. Quentin the Germans were
driven from the high ground between
Laventie and Haucourt. The Brit-
ish seized the village of Faucon and
neighboring defenses north of the
Saone river.The Germans made a strong attack
on a narrow front southeast of Ypres,
and reached the British support line.
They were driven from the British
breaches by a counter attack.

Official Announcement.

The announcement, which is timed
11:30 a.m. to-day, is as follows:"During the night there was severe
fighting at the end of Vimy Ridge,
where the enemy retained a footing.He was ejected, and an attempted
counter attack failed to materialize.The eastern slope of the ridge has
been cleared of the enemy and coun-
ter attacks repulsed.Our troops advanced and seized
the village of Faucon and neighbor-
ing defenses north and south of
St. Quentin.The number of prisoners yesterday
taken exceeds 9,000 and more than
forty guns were captured. In the
neighborhood of St. Quentin the en-
emy has been driven from the high
ground between La Vergne and Har-
court. Fighting continues through-
out the whole front.Yesterday an intense bombardment,
the enemy made strong attacks last night
on a narrow front southeast of Ypres,
and succeeded in reaching our support
lines. He was immediately ejected
from our trenches, leaving several
dead."

Victory Stirs England.

The news of the successful opening
of the British offensive has stirred in-
tense interest and hope throughout
the country. Whatever the enemy
may have intended as to the retreat in
the sector having been pre-
arranged and strategical, it is contend-
ed that the rebels before the blow
delivered in the Arns-Lens region
cannot be explained away in any
manner.It is urged that there is no
possible voluntary element in this re-
tirement and there can be no dispute
as to who took the initiative.A new chapter in the conflict on the
western front has begun, and whether
or not it is to prove the beginning of
a decisive battle, it is bound, accord-
ing to prevalent opinion here, to lead
to results of the highest importance.The main feature of the battle thus
far on which attention has been fo-
cused is the capture of Vimy Ridge,the immense value of this series of
heights which dominates the plain

of an elevation of 400 to 500 feet.

has been recognized throughout the
war, and great sacrifices have beenregarded as justifiable if they result
in its possession.The British and French fought for
control of the ridge in the summer of 1915, both
sides suffering heavy losses, but in
the end the Germans held the main
portion of the position. Later the
British took over the French line and
were ousted by the Germans from part
of the ridge which had been won by
their predecessor. One military critic
commenting on the present battle line
described the importance of Vimy
heights.

Heights Important Position.

They are admittedly the bastion of
the enemy's western line. Whatever
the Germans allow to go, he held
Vimy Ridge with grim resolve and
slished upon it all arts in fortifica-
tion and skill that the war has taught
him.Upon it hangs the whole strategy
of the enemy's retreat in the west.With Vimy firmly held, he can swing
his line further south slowly back

until he reaches the positions where he

has a mind to stand, and he can

cover the French industrial district

upon which he depends so much for
supplies. But with Vimy gone, the
defense of these districts is hard-
ly maintained, the rest of the whole
retreat line is given backward and is in considerable danger of fracture.The issues depending upon British
ability to hold the ridge are, there-
fore, immense. At the moment there
is nothing to suggest a doubt, but the
ridge will not be held, but the bat-
tle is continuing, and there is little
disposition here to retreat in confi-
dential prediction. Nevertheless, the
opinion is expressed that if the Ger-
mans are definitely driven back from
the ridge without hope of reattacking
they are likely enough to be com-
pelled to acknowledge retreat and re-
turn to what is called the Meuse line,
running from Verdun to Mauberge and
Lait.

On Fifty Mile Front.

In the meantime, the fighting goes

on over a front of about fifty miles,

roughly from Lens to St. Quentin, the
main attack being around the north
of Arras. As far as information goes,
everything is going well for the Brit-
ish and justifies their sanguine hope
but comments today generally include
a warning not to allow these hopes
to run too high. The general is known
to have great reserves of hand, and
from computation binds him to make
one effort to avoid defeat. The pa-
pers over the country it should await
events in the spirit of sober expecta-
tion and it is not the time for exuber-
ant boasting.

Take 3,500 Prisoners.

London, April 10.—Some 3,500 pris-
oners have been captured in the new
drive against the German lines by one
of the British armies alone, Reuter'scorrespondent at British headquarters
in London telegraphed late Monday.The prisoners have been coming in
an endless procession, the corre-
spondent reports.

The fighting is increasing in inten-

HERE IS THE DOCUMENT THAT PUT
UNITED STATES AND GERMANY AT WAR

(PUBLIC RESOLUTION, NO. 1. 65th CONGRESS)

S. J. Res. 1. 65th CONGRESS

Sixty-fifth Congress of the United States of America;

At the First Session,

Begun and held at the City of Washington on Monday, the second day of April, one thousand nine hundred and seventeen.

JOINT RESOLUTION

Declaring that a state of war exists between the Imperial German Government and the Government and the people of the United States and making provision to prosecute the same.

Whereas the Imperial German Government has committed repeated acts of war against the Government and the people of the United States of America: Therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the state of war between the United States and the Imperial German Government which has thus been thrust upon the United States is hereby formally declared; and that the President be, and he is hereby, authorized and directed to employ the entire naval and military forces of the United States and the resources of the Government to carry on war against the Imperial German Government; and to bring the conflict to a successful termination all of the resources of the country are hereby pledged by the Congress of the United States.

Chairman,

Speaker of the House of Representatives.

T. R. Marshall

Vice President of the United States and

President of the Senate.

Signed April 6, 1917.

Woodrow Wilson

It is the opinion of the House of Representatives that the war with Germany is imminent and that the President should take immediate steps to put the country in a state of war.

Indolent on Vegetables.
Dr. U. Ishizuka, a well known dietitian, who recently made a trip of observation in Korea and in Manchuria and other parts of China, says the Japan Chronicle, ascribes the docility and indolence of the Koreans to their predominantly vegetarian diet. To make them more alert and active it will be necessary to use much more animal food, in his opinion. The radish is the article of food most relished by Koreans, who eat it wild ginseng and eat it raw. But the most remarkable thing about their liking for vegetable food is the tremendous amount of cayenne pepper that they take. About one-fifth of the vegetables on sale at the markets is red pepper.

CAPTAIN CALDWELL TO TAKE COMPANY OUTDOORS TONIGHT

Unless Weather Prevents Entire Company Will Drill In Streets.—Outdoor Drills Attract Big Crowds.

For three hours each day during the good weather the corner of Milwaukee and Plaza streets is crowded with people watching the special guard detachment of the Second Separate company run through the various movements of close order drill and the manual of arms. To those who saw their men drill less than two weeks ago, their improvement is a great wonder, and a good sign of what may be expected from the entire company under the command of Captain Caldwell.

Although there have been no further orders received from the militia headquarters in Madison, every company in the state is daily expecting the command to entrain for Camp Douglas. The local companies are authorized to recruit to full war strength. It will take fifteen of that company and needs at least thirty men to insure against the loss entailed in the throwing out of men by the rigorous physical examinations which will be given by the army physicians at the mobilization camp. Since the present recruiting campaign started twenty men have enlisted, but under the stimulus of an actual state of war it is expected the men will come faster.

"Men are needed by the government by this company. If they cannot be raised by a volunteer system, drafting will be resorted to. Enlist in the local company of the national guard and escape the drafting system is the plan. Some men have been holding back to see what was "really going to happen." It has happened, the company has called for men. It must be recruited to full war strength. Let it be a real Janeville company, so join me," says Captain Caldwell. The captain can be found at his office in the armory over Kemmerer's garage.

Provided the entire company will take the open and thorough regular semi-daily drill, and will work out the various movements on the streets near the armory. All are urged to watch this drill. If the weather is bad the men will drill in the hall, where there is ample room for a large crowd of spectators.

In line with a recent communication from county police officials, Mr. O'Connor touches upon the fact that citizens of a foreign country with whom America is at war, who engage in improper or unlawful activities against its citizens, will be promptly and adequately dealt with in accordance with law, and all who refrain from such hostilities and abide by the laws of this country are entitled to pursue in peace their lives and occupations.

Officers of the law are requested by Mr. O'Connor to use their influence to prevent any outrages whatever of uncharitable outlined and to make arrangements at once with his office in case of any movement their respective locality which indicated possibilities of trouble.

Some evidence of the enthusiasm with which the men are taking up the work under Captain Caldwell is shown in the fact that Sunday afternoon about a dozen men came to the captain with a request to be allowed to drill. They realized they had experience, and wished to use their holiday in getting all they could out of the drill. This represents the spirit of the entire company; each man has pride in it, which cannot but make it a crack company if given a chance.

Officers of the Y. M. C. A. have come recruits the company would number fifty-two men.

Some evidence of the enthusiasm with which the men are taking up the work under Captain Caldwell is shown in the fact that Sunday afternoon about a dozen men came to the captain with a request to be allowed to drill. They realized they had experience, and wished to use their holiday in getting all they could out of the drill. This represents the spirit of the entire company; each man has pride in it, which cannot but make it a crack company if given a chance.

Officers of the Y. M. C. A. to-day offered the services of that association to the mayor and to the Second Separate company, to all who ever possible in the preparation of this city for a general call to arms. This is in line with the work of the association establishing branch camps and at the border during the recent mobilization of the national guard.

Though no definite plans have as yet been formulated by the city authorities as to what advantages will be taken of the offer, it was suggested that the Y. M. C. A. undertake the physical preparation of all boys in their preparation to their service under a universal military training measure, or previous to their enlistment in the army. Such a movement would be city wide and would be calculated to put the boys into such condition that they could easily take up the military training coming along.

The playgrounds established on the grounds of four of the grade schools of the city are designed to meet this need of the children for some recreation. As yet there is no provision for direct play in the schools, but in other cities such a step has followed when possible, except where such would interfere with some branch of the school work itself.

WEATHER FORECAST.

Fair and warmer tonight. Wednesday partly cloudy and warmer; fresh southerly winds.

ENLISTMENTS.

When the Revolutionary war started we had no trained army, only minute men. Colonists armed with rifle and powder and balls. It was not until the war was well along that there was really any organized Continental army. It took LaFayette to start the real system of regular mobilization and other foreign officers to teach the American riflemen the need and necessity for trained soldiers.

The war of Eighteen Twelve was for the most part fought by untrained militia. True, Lundy's Lane, and some other battles were won by soldiers of the regular service, but for the most part they were raw levies taken from the fields and the shops. They did not even know how to march—or the right foot from the left one—and wisps of straw were tied on one foot and hay on the other, and the command, "hay foot, straw foot" came into use. Then came the battle of New Orleans and the riflemen from the Ohio valley won the fight, against England's trained soldiers. No wonder we were elated. But the thought of the regular army grew.

Then came the Indian wars. Regulars and volunteers went down into the southern swamps and fought the Indians and conquered them. The regular army grew in importance. The Mexican war saw it still further increase in magnitude, but the days of Sixty One saw it diminish in strength and it was the volunteer army again that won this war, for both north and south of the Mason and Dixie line had gone the officers of the old army to positions of command.

Then came the Ninety Eight fiasco. It can be called nothing else. More men died of fever in the pest-ridden camps than died from bullet wounds. The regulars fought the battles then and the state militia proved themselves woefully weak when actually called upon. It was not their fault; they were ill prepared and poorly equipped. The volunteer soldiers were not to blame, but the government.

Today we face another war. Men are needed to fill the ranks of the various organizations of state militia and also of the volunteers, that will be called into service, to augment the regular army. It is a critical period in the nation's history. Experience has taught those in authority that the volunteer system is not the most successful. European nations have found the same conditions exist. They have found the "slackers" who managed to evade enlistment, and they have been forced to resort to compulsory enlistment, drafting if you please, to fill their ranks.

We are face to face with this condition right here at home. The national guard units are not filled. The Janesville company still lacks many men, and even if it is filled immediately the necessity of a draft right here at home is imminent, unless more interest and more enlistments are made within the next few days. The local company needs some more men to complete its quota, as some will doubtless be certain to be dropped by the federal government inspection, and in consequence many more must enlist without waiting to be drafted.

The first call for duty will be for the national guard. Then will come the call for volunteers, ages ranging from eighteen to thirty-five. If this quota of a half million men is not filled the remainder will be drafted, that is, they will be chosen by lot, and each community will be required to furnish so many men, with exceptions made for the men enlisted in the national guard organizations.

Under the law introduced in congress these volunteer army enlistments will be subject to the same oath as the national guardsmen. It will be no different. No matter whether the youths of Janesville enlist in the regular service, the national guard service, or the volunteer service, they will take the same oath of service. Three years with the colors and three years in reserve.

Really the only difference is that in the regular service the men must serve their three years actually with the colors and then three years in reserve if they do not re-enlist. With the volunteers the recruits enlist for service wherever they may be needed, with absolutely no choice, and must swear to the same oath and remain until discharged in service. As to the drafted men it is even more compulsory service. The indignity in the fact a man had to be drafted into the service is not sufficient, but under the provisions proposed in congress they will have to conform to the same regulations as those who volunteer or are members of the national guard.

Under the national guard regulations of the state of Wisconsin, the men are called to drill at certain periods. They are subject to call by the national government for duty, but when their tour of duty is completed they are to be returned to their home stations and mustered out of actual service. Between the four alternatives it would appear the national guard offered the best solution.

Enlisted in one of these units the man is not subject to draft, not subject to continuous service beyond the period of the war. The war over, the national guard units repair to their own cities—first to be mustered out—and continue as members of the national guard for the expiration of their term of service.

In the regulars they must serve their whole enlistment of three years, war or no war. In the volunteer service they must take the same oath and must await the national guard's retirement, before they are mustered out, and later when the compulsory training comes into effect, national guardsmen will not be called into service.

Talking it all over an enlistment in

the local national guard unit is a sign of patriotism and good judgment in the case of young men who earnestly desire to aid the nation and yet do not wish to handicap their civilian occupations. The regular army means three years' actual service. The volunteer bill practically means the same when passed, and the national guard unit—the Second Separate company—is the acme of the situation by enlistment under the state banner where you will be assured protection and the careful attention you would not receive through any other medium.

JUDGMENT.

These are trying times in our national history. This country, long known as the great melting pot of civilization—where persons of various races were moulded into one caste—Americans. We have in our midst in these war days many persons who were born on foreign soil, whose thoughts turn to the land of their birth, where dear brothers and sisters, nephews and nieces, still reside. The land of their adoption—the United States—is at war with their "fatherland" and they are torn between loyalty to the flag, with its bright stars and broad stripes that wave above them, and the inheritance of the past.

To these citizens the present struggle is most trying. Too many judges hastily an unspoken word or thought, interpret an action, with injustice to the individual, in their excess of patriotism. They are quick to criticize, to start slander, by unfortunate utterance, and its growth is mushroom-like as snowball, working a serious injustice. Judgment must be withheld until assured the individual under suspicion is actually engaged in some traitorous action.

Do not pass judgment on hasty evidence. We are one people, now and forever. Native born, or citizens by oath of allegiance, we must all stand together and support the government. We must not be prone to subject individuals, birth subjects of a foreign power, to suspicion because they sympathize with their native land, without reason to believe they offer insults to the land of their adoption.

Tales spread rapidly. Mere incidents may become a mountain within a short space of hours. Each story gains strength in its repetition, and until proven otherwise our foreign born population must and shall be considered as loyal citizens to the constitution and the government, as those native born.

Be temperate in your remarks and do not repeat slander and scandal. These are trying times and you may unknowingly, and without thought, inflict a hardship on an individual who has spoken hastily or inadvertently without meaning to.

BIRD SONGS.

In the poetic words of the Bible, "the time of the singing of birds has come." To all who are fond of nature, the world takes on a new brightness when the feathered songsters begin their spring concerts.

A bird's throat must be a mechanical marvel from the speed and facility with which it executes its roulades. No operatic singer ever secures such flexible work. Many men have become somewhat skillful in reproducing these songs by imitative whistles and calls. But at best it is but a crude imitation. The speed with which these bird notes are poured forth defies the human ear or any other instrument to catch.

The older people say bird life is less common than it was years ago, though observers say there has been some increase within a few years since bird preservation was agitated. We need the birds not merely for their enormous economic value, but to add their notes of cheer and joy to country life.

After blaming the women for not running gardens because the work would spoil their complexions, the men decide not to take hold of it, as they need the time to sit on the piazza and smoke.

Who would think to see the old hen stepping about the farm yard in her dignified and stately way, that she had just committed the joy stunt of laying those colored Easter eggs?

Among the pleasures which the average newspaper publishers felt like denying themselves during Lent, was that of inserting those long write-ups of enterments without charge.

The soprano singer need not feel that the message of Easter failed to reach the people merely because she did not strike the high G with a pure bird-like note.

About this time the coal companies usually reduce their price, and claim great credit because it is only twenty-five cents higher than it was a year ago.

The politicians who want river and harbor money have kindly refrained from pressing their demands for a few days while congress discusses war.

Still another case of strategic retirement to carefully prepared positions occurs when the editor perceives the spring poet coming in.

The rustle of the seed catalog leaves is heard in the land, but will the squash of the hoe in the damp earth be equally prominent?

The persons who went to church to see the spring hats Easter are convinced that millinery is what draws everyone, despite the cold.

The report that the British will capture Jerusalem is not an intimation that they will soon make a descent on New York City.

The pacifists have not yet decided whether to adopt a white rabbit or an old hen as the insignia to be carried in their processions.

About now the American youth joyously celebrates the return of spring by putting a baseball through the neighbor's window.

Lent being supposed to be a time for considering sins, many people observed it by considering other people's offenses.

Anyway the people look forward with calm confidence that congress will supply the usual full line of talk.

Some people will let a house remain empty for months rather than spend a few cents for a little To Rent ad.

Tomorrow the umpire will begin committing his overt acts.

ON THE SPUR of the MOMENT

ROY E. MOULTON

THE MANAGER.
With eager and attentive eye
He sees them every one,
The rube that scamper for the fly
And nabe it on the run.
The college lad with clumsy bunts,
He sees them fail or boot
For Speaker was a rookie once
And Cobb a bush recruit!

And some may seem to be immense
And others not at all,
And some may put it past the fence
And lose the blooming ball.

He sees them side and steal and
He throws,
He sees them fan the breeze,
A Wagner or perhaps a Groh,
Is any one of these?

Oh, some are short and some are
tall
And few are fair of face,
Yet eagerly he scans them all
To pick a Scout or Chase,
And when he last to seventeen
Or more the can ties.
"Ains' so few and far between
The S.S.ers are!" he cries.

TODAY'S SNEER.
Most People get All they Deserve in
Life and Lots of Them don't Deserve
It.

MUSIC.
A pleasant life is Eddy Barr's,
In fact it's quite a song;
He whistles past his motor cars,
Oh, how he hums along!

A Man Getting a Meal.
He always gets everything on the
stove at once and with a large assort-
ment of plates and implements in his
hands and arms he hovers over the
stove in great anxiety. He has an
idea that the more heat he has under
the food the sooner it will all be
over. He discovers that it will

over the place if some of it isn't re-
moved. He begins to juggle the
boiled eggs and screams with pain
when he is sprayed with hot grease
from the sputtering bacon. Some-
thing appears to be wrong with the
toast. Ah, yes, to be sure! It is
burnt. He removes toast gingerly,
burnt, over slightly burnt fingers, dabs
some in soda, tries to scrape burnt
toast to an edible appearance, sniffs
burnt stove at, plunges potatoes in
sink, pours water over bacon, and
sinks into a chair in a swoon. When
the neighbors come in a little later,
attracted by the screams and smoke,
he has recovered enough to sit up and
count over his fingers and bubble of
boiled eggs.

Pet Pests.
Jim Holler gives one such a pang,
He likes to argue and harrangue!

Say what you will you'll find that he
is always sure to disagree.

May all food disagree with Jim,
That's just the proper thing for him!

Of Course.

"Yes," said the dealer in An-
tiques, "this is our own patented
method of giving age and value
to rare articles of Art. By put-
ting this little book in the proper
place we give an authentic vase
of the prehistoric period."

"Ah," said the interested friend,
"the Nick of Time!"

Gold.

Gold was known from the earliest
historic times and is mentioned in the
eleventh verse of the second chapter
of Genesis. At first it was chiefly used

for ornaments. The trade of the gold-
smith is mentioned in the fourth verse
of the seventeenth chapter of Judges
in connection with the overlaying of
idols with gold leaf.

A want ad will rent that house.

GOING UP.

Moodily, Bushrod Hams drank his
oysters, twenty cents for an oyster stew!"

he muttered. "This cost of living
thing is getting on my nerves. If
things get up much higher, they can't
The darn stew tastes as if they chased
it a weak oyster through it to flavor it,
and only seven crackers to eat with it!"

And he clicked his teeth together
savagely. To his surprise they came
down on something round and hard.

"Huh! A Pearl!" cried Hams.

It was a pearl among pearls—quar-
ter of an inch in diameter and in
color a perfect Jennings white. The pro-
prietor, a thin man with large feet
and a small head, strolled over and
squinted at it.

"A right pert pearl!" he commented
admirably.

"What's it worth?" asked Hams.

The proprietor stroked his chin with
a dry, rasping sound.

"Well," he replied, "I'll put an oys-
ter in your stew for it."

"A large oyster?"

"Well—a fair sized one, ya."

"Done!" said Hams quickly. And he
handled over the pearl, and the other
stew drinkers watched enviously as
the proprietor dropped a real oyster
into his stew.

CAINVILLE CENTER

Cainville Center, April 9.—Mr. and
Mrs. Alie Carpenter and daughter
Carol of Janesville attended church
here Sunday morning.

Mr. Klusnever's tractor came last
week. They think it is going to be a
great help. It draws four plows, which
certainly will lighten the work for the
horses.

Leonard Lee of Janesville and Ben-
nett, Inc., of Brochard spent Sunday
at Charles Roberts'.

Roy Roberts was home Sunday.

Mr. and Mrs. Bruce Townsend and
little daughter Jane of Evansville at-
tended a church here Sunday morning
and spent the remainder of the day at
A. F. Townsend's.

Mr. Robert Meek of Janesville was
an over Saturday night and Sunday
visitor at A. F. Townsend's.

Mr. and Mrs. Frank Gardner and
little son Henry of Delavan and Mr.
and Mrs. Frank Gardner and daughter
Pauline of Janesville spent Sunday at
George Townsend's.

Mr. and Mrs. Frank Bennett, Mr.
and Mrs. Fenner and Blanche
Townsend and James Callahan spent
Sunday evening at Elliot Frase's.

Freddy of Footville spent
Sunday at her home here.

E. G. Townsend and family, Roy
Townsend and family of Janesville, R.
B. Townsend of Evansville and Dave
Andrew and family were entertained
at the parental home Sunday.

Mrs. William Drefahl and daughter
Cora were Janesville shoppers Satur-
day.

Eva and Ella Townsend, Anna Ar-
mit, Mary Butters and Nellie Gardner
attended teachers' meeting in Janes-
ville Saturday. Miss Doris Klusnever
was a Janesville shopper Saturday.

Miss Ella Rose of Footville, a cadet
at the Agricultural High School at
Cainville Gardner at Cainville school.

Miss Edna Barrett will be the cadet
this week. Miss Mary Butters will
also have one. There are thirty-five

prospective teachers sent out from the
training school to schools in the rural
districts this week to receive training
and glean what they can for the
week's outing.

FELLOWS' STATION

Fellows Station, April 9.—Mr. and
Mrs. Joseph Pickett and daughter
Eleanor spent Sunday with Mr. and
Mrs. John Knudson.

Many of the farmers of this vicinity
attended the big loyalty parade at Evans-
ville Saturday afternoon.

Mr. and Mrs. Charles Chantrey
spent Sunday with the latter's sister
and family and Mrs. Frank Thompson.

John Guhl of Leyden spent Sunday
with Mr. and Mrs. Herman Fenrich.

The White Star Neighborhood club
was well attended and all reported a
good time.

Mr. and Mrs. John Hoag and Mr.
and Mrs. Jim Johnson and baby of
Edgar spent Sunday with Mr. and
Mrs. John Kaudson.

Mr. and Mrs. Herman Fenrich, Jr.
entertained Sunday Mr. and Mrs.
Kersten and daughters Alice and
Mabel, and sons Lee Milbradt and
daughter Lois, all of Evansville.

High School and Church Teams in Championship Go

To Decide Championship of City in Hot Game Friday Night at High School Gym.

Practice for the final game of the basketball season at the local high school when the school team will meet a team picked from the church league for the championship of the city, is well under way and interest in the contest indicates a record crowd will turn out. Two teams have been picked from the various church teams, making an all-star representation, and from this Bill Werrell, their coach, will make a team which he contends will easily trim Coach Keck's varsity men.

The high school team, however, is in good condition and with five or six good practices will be in shape to handle anything the church league can turn out. There is much interest in the game, because of its local nature, and because the teams are evenly matched.

As a preliminary to the big game, the faculty will play on the juniors.

Heart and Home Problems

BY ELIZABETH THOMPSON

LETTERS MAY BE ADDRESSED TO MRS. THOMPSON, IN CARE OF THE GAZETTE

Mrs. Thompson: (1) When people are old enough to marry and are intending to do so, do they not the man should ask the girl's father for her?

I have met a young man every day for the last six months and I would like to make his acquaintance. He seems to be a gentleman and every respect and he works in one of the leading manufacturing concerns in the city. As none of my friends know him, how can I make his acquaintance?

D. D. AND B. B. (1) He does not need to ask his father for her.

It is best to say that he wants to marry her.

(2) There is no way for you to make the man's acquaintance. If you tried he would consider you forward.

Dear Mrs. Thompson: I am a boy sixteen years old. I have a girl friend of whom I think a great deal. We used to go to places of amusement. I would buy the tickets for all sorts of amusements and she would go. But now, everything I do does not please her. Doesn't this like me any more? I have been told by her friends that she does not like me, but I can hardly believe it, because she used to like me so well.

She accuses me of going to some of her friends, but I do not. What shall I do? I should hate awfully to give up this girl.

X. X. X. The girl still liked you she would not treat you the way she does.

Don't go to see her for several weeks and don't take her anywhere. You will think that she has lost you and she may realize that and does not like you after all. It would be a good plan to really go with one of her friends. If she likes you she

will be jealous and all the more eager to get you back. If she does not like you she won't care whom you go with.

Dear Mrs. Thompson: (1) I am a girl seventeen years old and I like a boy very much. I never went out with him, but whenever we met, he always talked real friendly to me. He is sick now and I sent him a bouquet of flowers. Do you think it was all right to do so?

(2) He is worse now. Would you send him another bouquet or a plant? It was nearly two weeks ago when I sent the others.

(3) Would it be right for me to see him while he is sick? S.O.P.

(1) He probably thought it was very thoughtful of you to send the flowers. It was entirely unnecessary to send them, but since you did it, there is the kindness of your heart.

Dear Mrs. Thompson: I am a young man of seventeen. Whenever I speak to anybody I blush, so that there is hardly a white spot on my face. Can you suggest anything that will cure me of this habit? L.

Worry about this habit makes you blush all the more. As you grow older and gain confidence in your self, you will not blush anymore.

Set your mind that you don't mind if you do blush. This attitude will be far more helpful than one of fear.

Dear Mrs. Thompson: (1) Is it proper for a girl of fifteen to go to a skating rink on Saturday afternoon if her mother does not object?

(2) Is twice a week too often for two girls of fifteen and seventeen to attend the picture show if it is only one block away?

GOLDEN LOCKS.

(1) I think she is too young.

(2) Once a week is enough.

The Business of Living

Another Misfortune Comes to Bring Wishes to the Little Home. There is a father, Douglas, heard his wife say as she opened the front door. He wondered where his little daughter, Eleanor, who always came to meet him. Eleanor appeared in the living room door and he hurried toward her, wondering what was the matter. Her hair was combed straight back from her face and she still had on her morning dress and apron.

"What is it?" he asked, stopping to kiss her. Margaret fell and broke her leg. The voice shook a little and she put her hand wearily to her head.

"How did it happen?" he asked, striding up to the doorway. "Daddy?" The little hands were outstretched and the face was lifted to be kissed as he bent over her.

"My leg is all done up in plaster. It is so heavy I can't lift it." Margaret's tone was bright though there were traces of tears on her face.

"Tell Daddy about it." He sat down in the rocker which the mother had been climbing a shoulder. "I was climbing a tree—" began the child.

"You are not big enough to climb trees. Why did you try it?" The father was stroking the ruffled hair.

"Oh, Jack was reading and I did not like to disturb him," was the quick answer.

"You are doing the boy and yourself a great wrong. He will grow up to be unutterably selfish and unkind." Douglas' glance was reproachful.

"It is more natural to do things than to ask anyone to do them for me. Eleanor gone was apologetic.

"It is the fault that you must correct. Such unselfishness breeds selfishness." Douglas had put little Margaret on the bed and stood with his hands on his wife's shoulders looking earnestly into her face.

"Why did you try to climb up there?" asked the father.

"I wanted to play with them and

Jack and a neighbor's boy were playing in their tree playhouse. They had had it for a long time and Margaret never thought of trying to get up in it before, stuck in the mother, instinctively coming to the rescue of Jack.

"How did you try to climb up there?" asked the father.

"I wanted to play with them and

Jack and a neighbor's boy were playing in their tree playhouse. They had had it for a long time and Margaret never thought of trying to get up in it before, stuck in the mother, instinctively coming to the rescue of Jack.

MOTHER WAS RIGHT.**SILLYSONNETS****...The... Magnificent Adventure**

A ROMANCE OF THE LEWIS AND CLARK EXPEDITION

By Emerson Hough, Author of "The Mississippi Bubble," "Fifty-four Forty or Fight," Etc.

Copyright, 1916, by Emerson Hough.

ped to the door beyond and knocked lightly, entering as he did so.

The hour was early—he himself had not breakfasted, beyond his coffee at the mill—but early as it was he knew he would find at his desk the gentleman who now turned to him.

CHAPTER IV.

President and Secretary.

"GOOD morning, Mr. Jefferson," said Meriwether Lewis in the greeting which he always used.

"Good morning, my son," said the other man gently in his invariable address to his secretary. "And how did Arthurus perform for you this morning?"

"Grandly, sir. He is a fine animal. I have never ridden a better."

"I envy you. I wish I could find the time I once had for my horses." He turned a whimsical glance at the paled desk before him. "If our new multi-graph could write a dozen letters all at once and on as many different themes, my son, we might perhaps get through. I vow, if I had the money I would have a dozen secretaries—if I could find them!"

The president rose now and stood, a tall and striking figure of a man over six feet in height, of clean cut features, dark hazel eyes and sandy, almost auburn, hair. His long, thin legs were clad in close fitting knee breeches of green velveteen, somewhat stained. His high collared coat, rolling above the loosely tied stock which girded his neck, was dingy brown in color and lay in loose folds. He was one of the worst clad men in Washington at that hour. His waistcoat of red was soiled and far from new, and his woolen stockings were covered with no better foot wear than carpet slippers, badly down at the heel.

But still Meriwether could only look into the face of his superior.

"I know very well, my son," the president continued. "I know it all. Pull her out of your heart, my boy. Listen to me. No young man

may work at his best and have a woman's face in his desk to haunt him. That will not do. We all have bandy legs—ah, yes, it is a woman!"

The young man did not speak.

"I have often told all my young friends," said Mr. Jefferson slowly after a time, "that they should marry not later than twenty-three—it is wrong to cheat the years of life—and you approach thirty now, my son. Why linger? Listen to me. No young man

will work at his best and have a woman's face in his desk to haunt him. That will not do. We all have bandy legs—ah, yes, it is a woman!"

"No! Never would I do that, Mr. Jefferson, believe me. But now I must beg of you, please, sir, let me go soon—let it be at once."

The older man stood looking at him for a time in silence as he went on hurriedly:

"I must say goodby to you best and noblest of men. Indeed, I have said goodby to—everything."

"As you say, your case is hopeless?"

"Yes, sir."

"Ah, well, we have both been planning for our western expedition these ten years, my son. So why should we fret if matters conspire to bring it about a trifle earlier than we planned?"

"I asked you when I was a boy to send me, but you could not then."

"No, but instead I sent yonder master—Meriwether Lewis. He, Ledyard and all the others failed me. They never saw the great vision. There it lies, unknown, tremendous—no man knows what—that new country. I have had to hide from the people of this republic this secret purpose which you and I have had of exploring the vast western country. I have picked you as the one man fitted for that work. I do not make mistakes. You are a born woodman and traveler. You are ready to my hand as the instrument for this magnificent adventure. I cannot well spare you now, but—yes, you must go!"

They stood there, two men who made

their great adventure for us vision seers.

vision owned, gazing each into the other's eyes.

"Send me now, Mr. Jefferson," repeated Meriwether Lewis. "Send me now. I will mend to usefulness again.

I will work for you all my life, sir,

need be, and I want my name clear with you."

(TO BE CONTINUED.)

Dinner Stories

The men of the fire department of a western town decided on the occasion of his birthday to present to their chief a fine axe. Elaborate preparations were made for the presentation and there was to be a presentation address.

The hall was flag draped when the big day came. On the platform sat a lot of firemen in full regalia. In the seats sat the prominent citizens of the town with their families. After a prayer by the minister, a piano solo, etc., came the presentation address.

The spokesman opened his mouth, but words came not. He looked at the chief, at the floor, at the ceiling, then made a wild gesture, gave a groan, and said:

"Here's your axe."

The chief, who had arisen, gave him one look of dumb consternation and rejoined:

"Gosh! Is that the axe?"

"Oh, yes, Irv," said honest Farmer Hornbeck, in reply to the inquiry of a friend. "I'm getting along real well with my new motor car. I have already learned to remember not to park around for too long, when I want 'Hill more' speed, and I say 'Hill' or 'Gee' when trying to turn a corner. I reckon likely by the middle of next month I'll be about over the habit of throwing a halter into the machine when I start for town."

At a certain public school it was the custom for the teacher to write on the blackboard any instructions they desired the janitor to receive.

One evening, while cleaning a room, the janitor saw written:

"Find the greatest common denominator."

"Hello!" he exclaimed. "Is that darned thing lost again?"

"Ah, well, we have both been planning for our western expedition these ten years, my son. So why should we fret if matters conspire to bring it about a trifle earlier than we planned?"

"I asked you when I was a boy to send me, but you could not then."

"No, but instead I sent yonder master—Meriwether Lewis. He, Ledyard and all the others failed me. They never saw the great vision. There it lies, unknown, tremendous—no man knows what—that new country. I have had to hide from the people of this republic this secret purpose which you and I have had of exploring the vast western country. I have picked you as the one man fitted for that work. I do not make mistakes. You are a born woodman and traveler. You are ready to my hand as the instrument for this magnificent adventure. I cannot well spare you now, but—yes, you must go!"

They stood there, two men who made

their great adventure for us vision seers.

vision owned, gazing each into the other's eyes.

"Send me now, Mr. Jefferson," repeated Meriwether Lewis. "Send me now. I will mend to usefulness again.

AN INVITATION TO WOMEN

Women are invited to visit the laboratory of the Lydia E. Pinkham Medicine Co. at Lynn, Mass., and for themselves with what accuracy, skill and cleanliness this wonderful remedy for women's ailments will be prepared. Over 360,000 pounds of roots and herbs are used annually in making this famous medicine. The great bins of herbs, the huge tanks filled with the medicine ready to be boiled, and the bottling room where it is put up and labelled for the market, cannot help but impress them with the reliability of this good, old-fashioned root and herb remedy, which for the past forty years has been so successful in the home treatment of female ills. Glittering Prospects For League Opening Wednesday Afternoon

Baseball opening tomorrow in both major leagues is going to be given the greatest show down the chutes in the world's series that it ever experienced. Set psychologically, physically and financially for a dash along the season's stretch, it is a game amount to heights it never before saw.

Gov. John R. O'Brien, president of the National League, brushed the anvil and squarely on its battered head, he said, expressed recently the belief that the game is entering the most successful period of its long and prosperous career.

Then had the hunch that war wasn't going to have much of effect in dragging the national meeting from a chosen peak on the apple of the public's eye. Only actual participation in the struggle on this side of the Atlantic, he said, could keep the game from wallowing in popularity right up to the last ball.

And if predictions hold out and the Chicago White Sox make their way into a cut of the world's series coin, some are going to fall quivering by the electric. The White Sox is a world's series tilt with the New York Giants, or any other club for that matter, probably would gum up history's pages with records of baseball and its offshoots. These things are in the offing. Baseball is going to be the hot topic of the day. If they don't come to pass the baseball world's going to be awfully disappointed.

There has been very little jockeying of teams during the winter months. Most of them will enter the conflict much the same shape as they quit last year, with the exception of the averages. First division teams are generally placed as follows:

American League: Chicago, Boston, Detroit, New York, National League: New York, Boston, Brooklyn and Philadelphia. Philadelphia in the American league and Cincinnati in the National, have provided the fans with some tender morsels of argument during the winter. Under the tutelage of Christy Mathewson the Reds had never a baseball team than the last. For the 1917 pennant race they had a lot of ball players since that famous saying, but it really looks as if he would cut more of a figure this year than since he wielded the ax on his one time steam roller. He has a fairly good infield, an average outfield, and a compact hitting staff. In addition, he has three splendid catchers. His team will be one of the leaders of hitting organizations in the American league. If his pitchers are equal to the task he'll make.

Turkmen are alarmed just now by the report that the Canadian parliament may curtail racing in the Dominion. A bill has been introduced limiting the number of race tracks in each province to one. If the bill passes, there will be twenty tracks in the provinces of Ontario and Quebec will close their gates. Last year racing outside of British Columbia, was conducted on the following race courses: In the Province of Ontario: Fort Erie, Connaught Park, Woodbine Park, Toronto, Mississauga, Park, Toronto, Etobicoke, Kentwood and Donvalley Parks, all of Windsor, and the Hamilton track. In the Province of Quebec: Delormier, Dorval, Blue Bonnets, Maisonneuve, King Edward, Mount Royal, and Kempton Parks, all located at Montreal. The proposed law will cut the racing season in Ontario and Quebec to fourteen days in the spring and fourteen in the fall.

Clark Griffith has decided to play Rice on first base instead of Judge or Shanks. Rice was a right-handed pitcher when he joined the Washingtons in 1915. He developed unusual skill in the hand, the old Fox fire, sent him to the outfield, last year he came up to the manager's expectations. Rice asked for an opportunity to cover the initial bag while the Washingtons were training at Augusta recently, and his fielding was a revelation. Griffith will keep Rice at that corner of the diamond indefinitely. Rice had a batting average of .299 in fifty-eight games last season, and it is believed that he will improve. Incidentally, Griffith has made a pretty fair pitcher out of Jimmie, the young outfielder whom he secured from the Buffalo club together with Judge a year ago.

There is a certain psychology connected with every sport that either makes or breaks it. Baseball is affected this way, perhaps, more than any of the others. It is impossible to make baseball popular under certain conditions, among which is the existence of a team such as the late lamented Federal and internal dissensions such as marked the life of the Base Ball Players' Fraternity.

If the fan is given something of this sort to take part of his attention from the real action of baseball, the game is going to suffer. The word influence of the fraternity was seen in the publicity given to many claims of ball players that they were being treated badly. It gave the fans something to talk about. It has been shown in the criticism of the threatened strike that the players were not in harmony and the public mind has been diverted.

There was no federal league last year, but the fact that it has had a full year to pass from memory will help the game tremendously.

West Side Alleys

"Bob" Daly's Moose beat "Bill" Taylor's Moose last night, 2,226 wins to 2,191. Scores:

Sykes.....168 165 144
Mather.....139 141 153
A. Kressin.....132 143 160

Totals.....781 869 741—2,191

The best prepared team in the American League, is a goal for which the White Sox owner is striving. The players are seeking another honor in the present baseball program. They are not after Ben Johnson's prize money, for being the best-drilled baseball company in the American League. Any other team will have to go some to deprive the Sox of either honor, according to those watching the team in Texas this Spring.

AMERICAN MAKERS SELL SPAIN AUTOS MINUS ALL RUBBER

SPECIAL TO THE GAZETTE

Madrid, April 10.—There are some curious features of the increase in trade between Spain and America which has resulted from the war, which was caused by the cutting of Germany's trade with Spain. While American automobile manufacturers are having a great boom in Spain, they have one curious drawback, not being able to bring along American tires, as there are rubber and contraband of war, subject to all kinds of restrictions and regulations.

The American auto trucks are causing a revolution in Madrid along three distinct lines: First, doing away with the huge, antiquated carts which labor along the streets; second, supplanting the tandem teams of oxen and donkeys, covered with jingling bells; and, finally, changing Madrid from one of the worst paved capitals of Europe to one of the best. The disappearance with a view of the disappearance of their ancient methods before the march of improvement.

A new application has arisen over the shipment of American meat to Spain. The Spanish ships were glad to get this class of freight, but the ships were not provided with the necessary refrigerating plant. As it is essential for shipping meat long distances, many Spanish ships are being overhauled to put in the modern cold-storage equipment so as to handle this new class of American product. Once equipped this way, fresh Spanish fruit will be going to American, and fresh American meat coming to Spain.

American flatirons and other electrical novelties are now being used for the first time, and the Spaniards say these articles are so much better than the German goods that they will come here that they will hold the market permanently even if the German trade gets a footing again after the war. Even American drugstores with American medicines have made their appearance along the streets of Madrid.

Besides starting into the place of France and Italy in supplying America with antiques, curios, etc., it is also having the effect of giving Spain a good deal of the American trade in perfumes, toilet articles and soaps, which used to go from France in large quantities. Some of these articles, such as castile soap, have their origin here in Castile.

It is in the American demand for their art treasures that the Spanish are taking their chief interest. Buyers for the big American department stores are now coming here for the first time instead of to Florence, Milan, Paris and other art centers from which it would be risky to ship art treasures now.

America could have received a number of the paintings of the great Spanish master Goya if it had not been for a recent complication at the New York custom house. The pictures actually went to New York, were held on the pier for some time because of irregularities in packing out papers, and were finally sent back here unopened. The owner had meantime made two trips to New York, and last gave up the shipment as hopeless. One of the pictures was Goya's study of Madame Haro, another his Virgin painted on a panel of wood, and a third a peasant dance, on wood.

Another artist is now taking to New York a Titan, called Salidad (solitude). The value recorded here is 500,000 pesos.

WOULD ABOLISH RANK OF BRIGADIER GENERAL

BY ASSOCIATED PRESS

Washington, April 10.—The rank of brigadier general in the United States army is abolished by the provisions of the army appropriation bill taken up today by the senate. All general officers after its announcement would have no less rank than that of major general.

Surplus articles about the house may easily be turned into cash by telling the people through the want ad columns.

WANTAD COLUMN

Thoughts on Taking a Bath.

One doesn't realize until one gets in a bath tub, how inconveniently the middle of one's back is arranged. You can't climb up your shoulders with a washrag and get at it. You can't dart under your arms and take it by surprise. You cannot take it in any satisfactory manner, except it is inaccessible.

Somebody invented a brush once that you could attach to a handle and send it out after the middle of your back with a load of soapsuds. But either the brush slips off, or the handle is lost. Or the handle is there and the brush is gone.

Undoubtedly, someone blundered in locating the middle of a man's back. Why couldn't it be abolished? We don't use it for anything but to clean against, anyhow.

ICELAND FACES STARVATION AS RESULT OF SEA POLICY

Copenhagen, April 10.—Iceland, which has been cut off from shipping the connecting with Europe and the United States for nearly six weeks, is facing starvation, owing to its small supply of foodstuffs and the failure of ships to arrive with expected supplies. As a result there is a strong sentiment here that a Danish warship loaded with supplies be despatched to the island country.

The submarine blockade, of course, responsible for the suspension of shipping to Iceland. There are more than one hundred Iceland merchants now in Copenhagen who are unable to return home.

DARIEN

Darien, April 9.—Mr. and Mrs. A. L. Ryer and Miss Marie Schaeferman spent Saturday in Janesville. Miss Gertrude Lawton of Delavan, spent from Friday until today with home folks.

Mr. Emma Teeple and daughter, Maud, arrived home Friday from Dallas, Texas, where they had spent the winter with the former's son, Charles.

They also stopped in St. Louis to visit Mr. and Mrs. Frank Marshall and Chicago, where they visited Mr. and Mrs. M. Dunham.

Mr. Henry Rockwell received the sad news this morning of the death of her uncle, John Williamson at Wadsworth, Ill. She left today to attend the funeral.

Albert Guyton of Beloit, spent Sunday in town.

Mr. and Mrs. Bell of Burlington, spent a week end at the home of his sister, Mrs. Lucius Wright.

Roscoe Johnson of Delavan, spent Saturday and Sunday at Henry Rockwell's.

Mr. Edna West went to Beloit Saturday to visit her son, Lyman, who has enlisted in the United States army.

Mr. Adrie Bell left today for Chicago, after spending several weeks with his sister, Mrs. Charles Weed.

Mr. and Mrs. E. H. Wood and Mr. and Mrs. Lisle Gray motored to Beloit Sunday.

Miss Elsie Hunsbuscher returned to Milwaukee this morning after visiting her parents, Mr. and Mrs. B. J. Hunsbuscher since Friday.

Miss Anna Johnson from here attended the funeral of Mrs. Anthony Tully at Delavan Saturday. She was a sister of Stewart Flynn and Mrs. Frank Cusack of Elken.

Miss Lorette Ives spent Sunday with her parents near Delavan.

The Easter services at the Baptist church Sunday were well attended.

Mr. and Mrs. Frank Carswell of Elkhorn and Mrs. Mosher of Delavan, visited at O. H. Capen's Sunday.

Harris Hastings of Chicago, spent Saturday and Sunday with his parents, Mr. and Mrs. L. E. Hastings.

Mr. and Mrs. Bruce Townsend and Jamesine Saturday afternoon.

Mr. and Mrs. Bruce Townsend and daughter of Evansville, attended services here Sunday morning.

Harold Wood of Beloit, spent the week end at his parental home.

Mr. and Mrs. Rueben Mathews' baby boy has been under the doctor's care the past week, but is better at present.

VETERAN OF CONFEDERATE ARMY WOULD JOIN THE UNION BLUE

SPECIAL TO THE GAZETTE

Little Rock, Arkansas, April 10. Another gratifying example of loyalty was demonstrated at the U. S. Navy Recruiting office in Little Rock, Arkansas, when Mr. J. L. Leigh of 1611 West Second street applied for enlistment in the United States navy.

Mr. Leigh requested that he be enlisted in a crew sent to the largest battleship afloat for service on board.

Mr. and Mrs. S. V. Wilson have been entertaining his brother, wife and baby from Oconto Falls the past week.

Mr. and Mrs. E. H. Clough of Milwaukee, spent Sunday with relatives here.

Miss Ida Burt of Rochester, visited Mrs. Maude Johnson here today.

MAGNOLIA CENTER

Magnolia Center, April 9. Miss Marie Meely spent Friday with her sister, Mrs. Edward Tierney.

Mr. and Mrs. E. A. Acheson and daughter Ruth and Mr. and Mrs. W. Brown of Evansville called on Miss Meely Saturday afternoon.

A number of them here spent Saturday afternoon at Evansville.

Miss and Mrs. George Bahr entertained relatives from Janesville the past week.

Paul Meely was a Janesville visitor Saturday.

R. E. Acheson of Evansville was a town Friday.

THE GOOD JUDGE FINDS JOCKEYS KNOW THE VALUE OF LASTING QUALITIES.

LISTEN TOMMY! W-B CIGARS

YOU CAN GET YOUR LAST CHEW ON THESE CIGARS CALL THE GOOD BOY CALL THEM "MALMOL CHEW" BECAUSE HE LASTS LONGER THAN ANY PLUG IN THE FIELD.

YOU men get to putting reliance into good stock.

Ever since you learned of the rich tobacco of which W-B CUT Chewing is made, there has been a big and increasing demand for it. The idea of shredding the leaf, so that you can get at the tobacco satisfaction without so much grinding and spitting, has made a winning with men also. The little chew that lasts and satisfies is the thing.

Made by WETMAN-BRUTON COMPANY, 1107 Broadway, New York City

WE LEAVE THE HOUSE IN PERFECT ORDER

It will surprise you to know how little disturbance is made in wiring your house for Electric Service.

Your friends will tell you the wiremen leave the house in as good condition as when the work was started.

There will be no repapering, no mutilation of plaster. Our expert wiremen will astonish you with the ease with which they "fish" the wires between the walls.

It sounds like a big job. It isn't. The expert wiremen are rapid workers and just a few days, sometimes only two, and they are gone and you are left with an electrically lighted house; a delight to you.

THE COST?

We've put the price down within the reach of all. Let us show you how little it will cost.

Why not inquire today?
